

Memorandum

Date March 8, 1982

From Associate Director for Field
Studies and Statistics, DCCP, NCI

Subject Epidemiology Working Group on Kaposi Sarcoma

To See Below

*See cc Dr. H. Kline.
Dr. Brant
File*

Because of fast-breaking developments in the epidemiologic study of Kaposi sarcoma, and our responsibility for collaborative research projects, I will be chairing an epidemiology working group (members below) to expedite review and coordination of NCI activities in this area.

I would like to schedule the first meeting for Tuesday, March 16 at 3 p.m. in my office. If this time is not convenient, please inform Dr. Deborah Winn (496-4153) immediately to see if an alternative time is possible.

At this meeting we will review the current status of our research projects on Kaposi sarcoma, and discuss plans and directions for future work. If you have any background material or research protocols available now for consideration, please give eight copies to Dr. Winn for circulation to the working group. If there are other persons you feel should be asked to join the group, on an ongoing basis or for a particular meeting, please let me know.

Joseph Fraumeni
Joseph F. Fraumeni, Jr., M.D.

Addressees:

Dr. William Blattner
Dr. Mark Greene
Dr. James Goedert
Dr. Robert Biggar
Dr. Dean Mann
Dr. Robert Hoover
Dr. Deborah Winn (Executive Secretary)
